

**Humanitarian project initiative "LOGO-development"
for the modernization of the group unit
of the state educational establishment
"Kindergarten № 26 of Lida"**

1. The name of the project:

"LOGO-development"; the modernization of the group unit (canteen, bedroom, play, toilet, locker rooms) of the group of integrated education and upbringing, the teacher-defectologist's office of the state educational establishment "Kindergarten № 26 of Lida"

2. The project implementation period: 12 months

2. The recipient organization:

State educational establishment "Kindergarten № 26 of Lida"

The aim of the project: the creation of a safe, adaptive subject environment that promotes physical, psychological and speech development of children with mental development disorders (learning difficulties) through the modernization of the group unit and the teacher-defectologist's office; the promotion of the state policy on social adaptation and integration of children with special psychophysical development

3. The project objectives:

The creation of an adaptive, developing, subject-spatial environment that satisfies special educational needs of children with mental development disorders (learning difficulties);

- the improvement of special conditions for education and correction of existing physical and mental disorders of children with mental development disorders (learning difficulties);
- the creation of conditions for the development of compensatory abilities, correction and minimization of disorders in the psychophysical development of children with autism spectrum disorder;
- the creation of conditions for an accessible communication system in order to normalize the life of children with mental development disorders (learning difficulties);
- the improvement of psychoemotional state of pupils by organizing play and educational activities in the sensory room;
- the preservation and strengthening of the psychophysical and emotional state of health of preschool children with mental development disorders (learning difficulties).

5. The target group: children aged 4 to 6 (7) years

6. The description of the project activities:

Today a model of integrated education has been created in the educational system of the republic, which is a significant achievement compared to the previously existing model of separate education, when a child with special psychophysical development had no chance to study with his peers. However, work practice shows that it is not enough to integrate a child with special needs into the peer environment, it is necessary to create special conditions for realizing the potential of such a child.

The group of integrated education and training of the state educational establishment "Kindergarten № 26 of Lida" is attended by 4 pupils with mental development disorders (learning difficulties) having systemic speech underdevelopment – level I; one of the pupils has autistic disorders. It should be noted that 3 of them are disabled children.

A distinctive feature of the project initiative is the creation of an adaptive educational developing subject-spatial environment unique for Lida and Lida district at the preschool education level, which will help to improve the quality of the educational process, correction work with pupils with mental development disorders (learning difficulties), and will also provide psychological and pedagogical support for more children with mental disorders development (learning difficulties).

To implement the project, it is necessary:

-the repair work on the modernization of the group unit and the office of the teacher-defectologist of the integrated education and upbringing (the replacement of window and door blocks, flooring, wall painting, installation of a suspended ceiling);

-the equipment of the group room with adjustable children's furniture (tables and chairs), games and toys;

-the sensor room equipment (an air bubble tube with a soft platform, a fiber optic equipment, a table with sand and lighting, etc.);

-the equipment of the teacher-defectologist's office with children's furniture (tables, chairs), furniture for the teacher's work area (a table, a chair, furniture for storing documentation and manuals, a massage couch, etc.), modern teaching aids (a computer, a printer, a portable music speaker, an interactive panel, etc.), means of education and training (a magnetically-slate board, a wall mirror, individual mirrors, probes, a sterilizer, didactic manuals, wall busyboards, a balancer, a Numekon set, a tunnel, etc.).

7. The total funding (in US dollars): 29341.

The source of financing	The amount of financing
The donor funds	29041
Co-financing	300

8. The place of project implementation (region/ district, city): 231300, Grodno region, Lida, Naberezhnaya street. 3, k. 2
