Functioning of the parent school "Rastishka" on the base of the inter-district rehabilitation department of Lida Central District Hospital.

Organization of joint consultations by medical workers of the inter-district rehabilitation department of Lida Central District Hospital, specialists of the Center for Correctional Developmental Education and Rehabilitation for teachers of educational institutions.

Interaction of the teachers of the Center for Correctional Developmental Education and Rehabilitation with the specialists of the Early Intervention Center of the children's polyclinic of Lida Central District Hospital on comprehensive care for young children.

At present, there are all the necessary conditions in Lida district for purposeful solution of specific problems related to providing psychological and pedagogical assistance to children with special needs of psychophysical development and their families.

Since January 2005 at the Educational Institution State Lida District Center for Correctional Developmental Education and Rehabilitation" (hereinafter referred to as CCDEandR) there is an office of early comprehensive care (hereinafter referred to as the office of ECC). According to sanitary norms, rules and hygienic standards an adaptive educational system has been created in the office of early comprehensive care, which provides young children with a varied sensory experience, activity in motion, game, object-practical activity. The office of ECC of the CCDEandR is equipped in accordance with an approximate list of basic equipment, games and didactic teaching aids for the Early Comprehensive Care Room, approved June 10, 2014 (equipment is 86%). Therefore, working with children at an early age, the equipment of the physical rehabilitation room and of the teacherpsychologist room is additionally used: ball pool, game tunnels, massage paths, trampoline, hoops, gymnastic mats, wedges, fitballs, hanging chair, etc.

Classes in the office of ECC are held in an individual form, which does not allow to cover more children with correctional assistance of the specialists

However, due to the increase in the area of the office of ECC from 34.0 sq.m. up to 61.4 sq.m. the solution to this problem is possible through the implementation of the project "Step by Step" to create, enrich, replenish and update the developing educational environment to provide early comprehensive care for children aged 0 to 3 in the conditions of the CCDEandR. Since the work of specialists cannot be started without special logistics, then it is necessary to have 3-4 sets of educational toys for children of an early age, functional furniture and literature for group classes. It is also necessary to have special furniture for diagnosing development - computer, multiplying and video equipment so that specialists can receive small children and their families.

Thus, this project is aimed at the socialization of young children
