Conducting sports events: physical culture holidays, lightning strikes, quests.

Conducting a district competition "All together" on the development of motor activity for children with severe, multiple disabilities in physical and (or) mental development.

From September 1, 2023, the Lida district center for

correctional and developmental training and rehabilitation will operate on the basis of the former kindergarten of Lida, the territory of which does not meet the requirements for accessibility of special education institutions, children's playgrounds are not fully equipped with special equipment.

In the 1st half of 2023, at the expense of sponsorship funds, outbuildings (swings, a table with benches, a balance beam, children's play equipment) were purchased in the amount of 10494.00 bel.rub., which is not enough due to the increase in the number and area of playgrounds of the center for correctional and developmental training and rehabilitation

However, due to insufficient allocations, it is currently not impossible to fully equip the playgrounds of the center with special outdoor equipment.

The solution of the issues of the development of inclusive education of children with disabilities is directly related to the need to create an accessible environment in the education and rehabilitation of this category of children. Providing opportunities to communicate with healthy peers in various leisure activities is one of the most urgent problems of rehabilitation of disabled children. It is important for all children, regardless of concomitant motor disorders, physical performance and social maturity, to systematically participate in organized physical education classes and sports events available to them. As you know, with each type of child pathology in development, certain sports exercises are contraindicated, adaptive physical culture is recommended. Thus, in order not to harm students with various pathologies, only those types of sports equipment that contribute to the development and rehabilitation of the health of children with special features of psychophysical development should be used.

During the implementation of this project, in an adaptive, safe environment, it will be possible to use special equipment for organizing and conducting various physical culture and recreation events, including with the participation of healthy peers on the territory of multifunctional sports and playgrounds of the center for correctional and developmental training and rehabilitation

The creation of an inclusive territory of playgrounds "Magic Town" within the framework of the project will contribute to the preservation and strengthening of the health of both ordinary children and children with special psychophysical development. In addition to the development of motor activity, the joint activities of children, their legal representatives, teachers and volunteers at the sites will allow everyone to expand their circle of communication, develop communication skills. Legal representatives will be able to form a new sense of life, harmonize self-awareness and relationships within the family, promote social adaptation in the situation of raising a child with special psychophysical development. Peers will get to know the

	world of "special" children better, learn to accept others as they are, conditions will be created for the formation of moral and spiritual values.
<b>8. The total amount of funding (USD)</b>	40 298
<b>Donor funds:</b>	39 313
<b>Co-financing:</b>	985
<b>9. Project location (region/ district, city):</b>	231300, Grodno region, Lida district, Lida, Pobeda Avenue, 7
